Oggetto: I: Message Chilean Society of Gastroenterology

Dear Dr. Pablo Cortés,

thank you so much on behalf of all Italian Gastroenterologists for your letter of encouragement and solidarity.

Thank you also, for the closeness of your Society to Italy and to all the other countries seriously affected by COVID-19.

We hope that everything will be okay for everyone and that we will soon be out.

Sincerely,

Dr. Luigi Pasquale

Dr. Luigi Pasquale

Presidente

Società Italiana di Endoscopia Digestiva

Dear Friends and Colleagues

We are all involved in an inedit and terrible COVID-19 pandemic, that hasn't clear evolution and ending. On the contrary worst times are to come.

Live and death, are there. Clear health policies and the commitment of the entire medical teams, are required. All in the same direction. The aim is to save lives.

We encourage to all the health involved personel, who are giving their best in this crisis. Our deep gratitude and tribute to all those working hard, day after day, inmersed in sorrow and tears. Even to those who have lost their own life in the uneven fight.

Best wishes to all gastroenterologists involved in this crusade in China, Spain, Italy, Iran and the USA due to their numbers nowadays. Probably those numbers sooner or later shall involve similarly other countries and regions, with worse results in those handicapped.

Gratitude is also for all those involved in developping vaccines and new therapeutic options.

Domino effects are also expected and global economics instability comes after and we should also deal with those consequences.

On Behalf of the Chilean Society of Gastroenterology, we want to give all our colleagues, our force and prayers, hoping this crisis comes to an end.

Sincerely,

Dr. Pablo Cortés
President
